- Folding frame has a sleek titanium finish
- Adjustable seat depth allow for plenty of growth
- Seat-to-Back Angle from 80° to 95°
- Crash tested for transit

"We received the stroller. It is better than we imagined. Our school kids and staff were so excited to get it set up and try it out with our student. We found your company through our community occupational therapist and with some research looking into a better outdoor chair for our student. Our deciding reason was your overall customer support with getting us the best chair for the price."

A.S.
